# Joint Tape 7 CSA

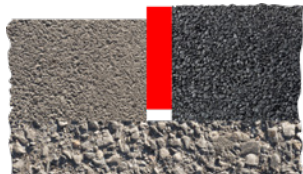

For good reason, the secure closing of joints in traffic areas is precisely regulated. The additional technical conditions of contract and guidelines for joints in traffic areas in the version of 2015 (ZTV Fug-StB 15) are valid to new road construction, conservation measures and for airfield fortifications. For this reason, we have further developed our proven joint tape. The special design in conjunction with a self-adhesive high-performance adhesive ensures an easy, fast and safe installation. The BORNIT® Joint Tape 7 CSA corresponds to the specifications of the ZTV Fug-StB 15.

*In theory...*

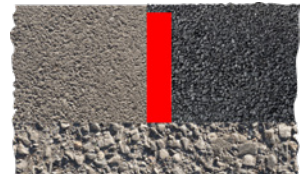

according to ZTV-Fug StB15

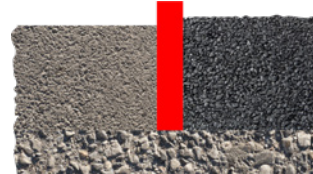

*In practice...*

... slips downward.

... installed too low.

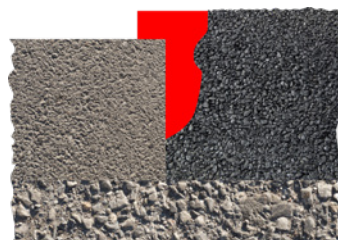

... installed too high.

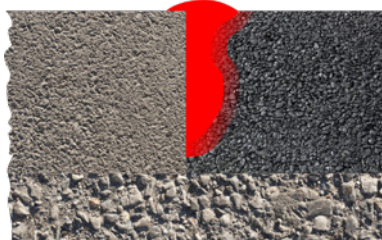

With **BORNIT® Joint Tape 7 CSA:**

- better connections with safe rivet head installation
- safe connection to roadway installations such as manhole covers, hydrant caps and road inlets
- better flexibility between old and new asphalt

**PATENTED**

Mechanical fixation with defined protrusion

Secure sealing of the connection with a uniform joint fit

## BORNIT® Joint Tape 7 CSA

Patented, shape-moulded, cold self-adhesive bitumen joint tape for the formation of joints in road construction. The innovative shape with the integrated “mounting claw” ensures fast work progress and tight sealing of the joint. The special flank formation reduces the risk of asphalt voids underneath the tape. Tested in compliance with ZTV Fug-StB 15. Prime with BORNIT® Hot Compound Primer or BORNIT® Hot Compound Primer Spray.

Color: black

Complementary products: Prime with BORNIT®-Hot Compound Primer or BORNIT®-Hot Compound Primer Spray. Clean with BORNIT®-MultiClean

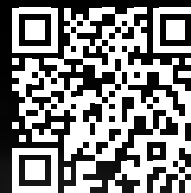

Your 7-advantages:

- Innovative cross-section with patented design
- Defined, secure rivet heat formation
- Tapered joint tape base – no voids in the asphalt underneath the joint tape
- Secure, easy and fast assembly with integrated “assembly claw” and Cold Self Adhesive
- Secure handling, no more slippage of the tape – only one dimension necessary – less need for storage space
- Lower storage effort – less bound capital
- **BORNIT®-Joint Tape 7 CSA** = Secure sealing of the connection!
