

FFM 15 carbide joint cutter

For expansion of cracks and for cutting joints in asphalt surfaces.

- Slow moving hydraulically-powered tool to reduce dust creation and high daily output
- Very manoeuvrable due to small cutting disc and special chassis to rest on with hydraulic propulsion and rollbar with loading lug.
- Quiet water-cooled Kubota diesel engine with electric starter
- Vehicle lighting package consisting of rotating light, turn signals, work headlights and taillights
- Reliable under the most harsh operating conditions

Description	FFM 15
Item no.	5369 0000
Engine	Water-cooled 2-cylinder Kubota diesel engine 11 kW at 3.
Hydraulic cutting shaft drive	Cutting disc attached via additional bearing to the hydraulic
Traction drive	Hydraulic approx. 0-5 km/h with hydraulic steering
Approx. weight	680 kg
Approx. length	2050 mm
Approx. width	670 mm
Approx. height	2000 mm/1450 mm
Options	
Cutting disc Ø 160mm	5369 8100
Cutting disc Ø 180mm	5369 8200

Subject to technical changes.
